COMPANY PROFILE

# TechSol for IT Solutions & Digitalization

TECHSOLSA.COM

# COMPANY OVERVIEW

## INTRODUCTION

In our rapidly expanding world, there has never been a need for digitalization as much as there is in the last few years. It was long understood that only companies with multiple offices all over the globe are the ones that needed any form of digital presence. Now, not having any digital presence means that your institution is very close to non-existing at all! This unprecedented need for digital solutions and IT infrastructure is what keeps pushing TechSol towards success guided by our core understanding that quality, reliability, and meticulousness superceeds any other possible value that any IT company can provide.

# OUR COMPANY

## ABOUT US

TechSol is a Saudi IT services company that provides a myriad of IT solutions of different categories as well as digitalization services.

## GOALS

1

### UNMATCHED SERVICE

We seek to achieve a level of quality and sustainability that ensures our superiority among competitors.

2

### CUSTOMER CARE

We strive to leave our customers always satisfied even if it goes beyond written agreements.

3

### SUSTAINABILITY

We make sure to finalize our project with an eye on sustainability as we think it is necessary for the delivered service to be sustained, even beyond our supervision.

4

### IT VISIONARIES

Being visionaries in a rapidly changing field like IT might be challenging, but we set ourselves towards that goal regardless as we believe that it is essential for leadership.

OUR COMPANY

# COMPANY VALUES

**Creativity:** In a competitive world, creativity becomes a survival skill as those who can create and innovate will always find a way.

**High Standards:** We always try to keep our standards for the delivered services at its highest.

**Transparency:** In service sector, communicating with clients with transparency is essential for establishing trust and efficiency.

**Unity:** We realized the power of unity at very early stages and we view it as our super power that can boost our productivity significantly.

# OUR SERVICES

## WHAT CAN WE DO?

Along the past 8 years, we have been providing services for various types of clients in different sectors. We take pride in the fact that our team contains experienced individuals that excel at different branches of IT services. Our services can be described by these 4 categories.

### 1 IT SUPPORT AND MANAGEMENT

Integrated Hosting, Emails, and Security Services

### 2 NETWORKING CONSULTATIONS

Networking and Surveillance Setup & Maintenance Solutions

### 3 IT CONSULTANCY & TRAINING

Analysis, Evaluations, and Consultations

### 4 WEB SERVICES

Customized Web Apps, Web Development & Optimization

### 5 E-COMMERCE & MARKETING

Establishment, Management, and Marketing of Online Stores

## OUR SERVICES

# HOW OUR SERVICES WORK

A process is set forth and sustained to ensure a satisfactory output. Similar principles are adapted to excute the various processes of our services. Our team is comprised of different people with different expertise all working together on a single solution and thus, a plan must be set and excuted perfectly.

## OUR PRODUCTS

# INTRODUCTION

With years of experiencing serving clients in different fields, it came to our mind that there is a demand for certain types of solutions that come along with some degree of customizability. We have fixed packages/solutions that satisfy many of these different needs. Our vision includes the development of many more of these solutions but currently we maintain and provide 3 systems.
